

Ashfield Polish Club Green Policy & Mission Statement

Our Mission Statement:

To provide the very best meeting place for people through catering, entertainment, and fellowship. We aim to do this whilst keeping our footprint on this earth as minimal as possible.

How we do this:

- We encourage local people to walk to the Club.
- We encourage people to use public transport.
- We encourage the use of carpooling.
- We encourage the reusing, reduction and recycling of items from our restaurant and bar, such as glass and cardboard.
- We encourage people to bring their own reusable container to the restaurant for take-away food.
- We have banned the use of exploitative products such as plastic bottles and plastic straws.
- We use natural gas in the kitchen.
- We have replaced inefficient temperature control devices with very efficient reverse cycle air conditioning.
- We never use air conditioning in empty rooms, and it is switched off throughout the club when closed.
- We aim to reduce the number of Annual Reports and AGM Booklets to 20% of its current print run. We will make this information available via email for members, and do a small print run for elderly members.
- We have a Green Point on the Agenda at each monthly Board Meeting.
